

# Cyber Resilience Courses for Workloads and Features

Focused, bite-sized training to protect critical workloads and leveraging Commvault Cloud capabilities.

## OVERVIEW

This learning portfolio delivers targeted training across key workloads, platforms, and cyber resilience capabilities within Commvault Cloud. Designed for IT and security professionals, these short courses build practical skills to protect data, detect threats, and enable rapid recovery across hybrid and SaaS environments.

## WHAT'S INCLUDED

### Workload & Infrastructure Protect

- Microsoft SQL and Azure SQL Databases
- Oracle
- SAP HANA
- Amazon EC2
- Microsoft Azure VMs
- VMware
- Nutanix AHV
- Kubernetes Protection

### Cyber Resilience & Recovery

- Auto Recovery
- Threat Scan
- Risk Analysis
- Cloud Rewind
- Cleanroom Recovery
- Advanced MediaAgent
- Advanced Indexing

### SaaS & Endpoint Protection

- Microsoft 365 (M365)
- Google Workspace
- Salesforce
- Laptop Protection
- File Server Protection

### Identity & Access Protection

- Active Directory and Entra ID

## WHAT YOU'LL LEARN

- Apply Commvault Cloud capabilities to protect your workloads and platforms
- Configure protection for SaaS applications, endpoints, and hybrid environments
- Identify risks and detect threats using built-in analysis and scanning tools
- Align data protection strategies with cyber resilience best practices

## FORMAT & DURATION

- Self-paced, bite-sized courses (15–40 minutes each)
- Flexible learning paths by role or workload

## IDEAL AUDIENCE

- IT Administrators
- Security and Cyber Resilience Professionals

## CERTIFICATION

These courses fulfill some requirements for Commvault certifications.
